DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Data structures, i.e. aperiodic recursive multiplex (ARM) code, which are not claimed as being embodied within a computer-readable medium, are not capable of causing any type of useful change. These claims are merely a set of instruction directed towards nonstatutory functional descriptive material.

Allowable Subject Matter

2. Claims 5-8 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the prior art of record fails to disclose or fairly suggest an apparatus for generating an aperiodic recursive multiplex code comprising: a multiplier for multiplying a first sequence by, a second sequence which alternates between +1 and -1, to produce a third sequence, where the second and first sequence are identical in length; and a multiplexer for time-multiplexing the first sequence and third sequence until the code having a predetermined length is created.

Regarding claim 7, the prior art of record fails to disclose or fairly suggest an apparatus for generating an aperiodic recursive multiplex code comprising: a multiplier for multiplying a first sequence by, a second sequence which alternates between +1 and -1, to produce a third sequence, where the second and first sequence are identical in length; and a multiplexer for time multiplexing the first sequence and third sequence; and a controller for re-designating a sequence output from the multiplexer as the first sequence and re-inputting the designated sequence to the multiplier and the multiplexer until the ARM code having the predetermined length is created.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
